

Ministerium Tuum Imple Love Serve Do the best that is possible

## **A specialist Science College and Training School Invites you to a Public Understanding of Science Lecture:**

### **Artificial Intelligence: Can Machines Outperform Humans?**

Professor Stephen Hawking once stated that “The development of full artificial intelligence could spell the end of the human race”. Google, Facebook, Amazon and many other firms are already in an AI race to build sophisticated systems that are capable of doing all sorts of jobs. This talk aims to provide you with a general non-technical introduction to machine learning.

Dr Al-Assam will explain the general concepts behind different machine learning approaches, and highlight the main types of problems that can be solved using such approaches. He will then try to address some difficult questions such as: “what can computers really do?” and “is Artificial Intelligence really scary?”.

**A talk by Dr Hisham Al-Assam - University of Buckingham**

Science

**Wednesday 11th May at 7.30 pm**

Lecture Theatre, St Paul's Catholic School, Phoenix Drive,  
Leadenhall, Milton Keynes, MK6 5EN. (Enquiries 01908 669735)
